### EMA 600: Introduction to Engineering for Engineering Managers

Center: Online

#### Course Prerequisites

None

#### Course Description

Explore the various engineering disciplines through a series of case studies that illustrate how an engineer's creativity, analytical nature, and curiosity are applied to develop, produce, and support products. Review key examples of engineered systems, new trends in the field, and concerns such as safety, security, and dependability of systems.

#### Course Outcomes

- Examine fundamental engineering design methodologies and their implications for effectively organizing highly specialized resources and personnel within engineering projects
- Illustrate the distinct mindset common to engineers by identifying motivations, dispositions, and assumptions that impact work performance
- Translate information critical to the success of engineering projects by applying appropriate technical and nontechnical terminology
- Evaluate codes of ethics regulating the various engineering disciplines for their implications for appropriate engineering management
- Analyze engineering projects as complex systems that require strategic management for successfully executing project plans

#### Required Materials

Using your learning resources is critical to your success in this course. Please purchase directly through the [SNHU Online Bookstore](#) rather than any other vendor. Purchasing directly from the bookstore ensures that you will obtain the correct materials and that the IT Service Desk, your advisor, and the instructor can provide you with support if you have problems.

### Diversity, Equity, and Inclusion

As indicated in our core values, SNHU is committed to “embrace diversity where we encourage and respect diverse identities, ideas, and perspectives by honoring difference, amplifying belonging, engaging civilly, and breaking down barriers to bring our mission to life.”

This may or will be reflected in SNHU’s curriculum as we embrace and practice diversity, equity, and inclusion (DEI) to provide the most transformative experience for our students, faculty, and staff. Because topics pertaining to DEI can be sensitive, please remember that embodying and practicing diversity, equity, and inclusion is one of our core values that you will encounter throughout the academic experience. In higher education, we are expected to think and engage critically. Use a growth mindset to embrace the diverse readings, course assignments, and experiences of your peers and faculty.

For more information about DEI at SNHU, please visit our website at the [Office of Diversity and Inclusion](#).

### Instructor Availability and Response Time

Your class interaction with the instructor and your classmates will take place on a regular, ongoing basis. Your instructor will be actively engaged within the course throughout the week. You will normally communicate with your instructor in the weekly discussions or the General Questions discussion topic so that your questions and the instructor’s answers benefit the entire class. You should feel free, however, to communicate with your instructor via SNHU email at any time, particularly when you want to discuss something of a personal or sensitive nature. Your instructor will generally provide a response within 24 hours. Instructors will post grades and feedback (as applicable) within seven days of an assignment’s due date, or within seven days of a late submission.
