BIO 205: Human Anatomy and Physiology I

Center: Online

Course Prerequisites

None

Course Description

BIO 205 Human Anatomy and Physiology I is the first of two courses examining the structure, function, and interdependence of human body systems. The course begins at the cellular and molecular levels with a concentration on the organization of the human body as a symbiotic system. The integumentary, skeletal, muscular, and nervous systems provide focal points for case studies and discussions throughout the term. The laboratory component allows the student to integrate and apply theory based knowledge from the course to simulations and critical appraisal exercises.

Course Outcomes

- Describe the location and functions of human body systems using appropriate terminology
- Analyze the interactions between human body systems for how they work together to achieve a healthy state
- Analyze research on human body systems for identifying evidence-based prevention, diagnosis, and treatment strategies for related diseased states

Your class interaction with the instructor and your classmates will take place on a regular, ongoing basis. Your instructor will be actively engaged within the course throughout the week. You will normally communicate with your instructor in the weekly discussions or the General Questions discussion topic so that your questions and the instructor’s answers benefit the entire class. You should feel free, however, to communicate with your instructor via SNHU email at any time, particularly when you want to discuss something of a personal or sensitive nature. Your instructor will generally provide a response within 24 hours. Instructors will post grades and feedback (as applicable) within seven days of an assignment’s due date, or within seven days of a late submission.
